

AIS Products

Applied Innovative products received the Plant Engineering's Product of the Year award in 2003!

The Speed Switch Family

A full line of Speed Switches for all shaft systems. Available in high temperature and vAC and vDC as well as other common applications. The Watchdog Timer

A unique device used for activating alarms, interlocks, or other devices on conveyor belt systems. The MA Adapter

The sister product to the MS family. Used to attach encoders or other shaft driven sensors directly to shaft driven equipment. The MS-P Generator

Attached through a troughing idler, this generator delivers enough DC power supply for sensors and wireless transmitters.
